

Overview

Video content alone boosts content retention, and when combined with other engagement tools and visuals it can create a truly compelling experience. INXPO STUDIO gives you the tools to easily bring together multiple presenters and media sources. This empowers you to create broadcast-quality presentations without the need for expensive hardware or training.

- **Slides**
Share slides right inside the stream using picture-in-picture mode.
- **Phone**
Dial-in option for presenters on the go or those who are not comfortable on camera.
- **Video Conferencing**
Users of any video conferencing solution can dial-in to join the broadcast.
- **Webcam**
Speakers can join a presentation using the camera and mic built into their computer.

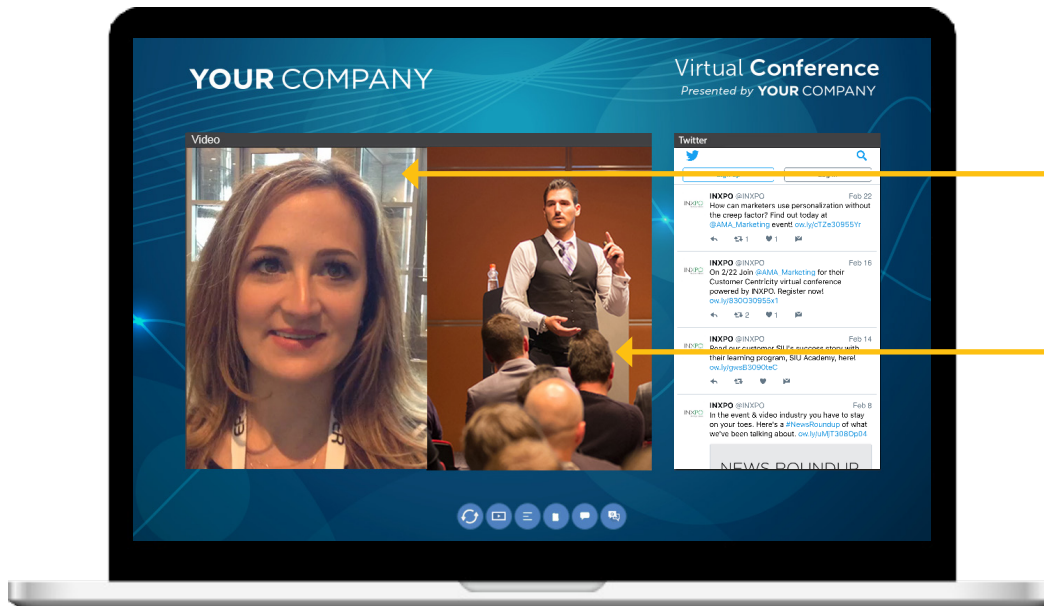

Screen Sharing

Share your desktop with the audience with one-click, no special software required.

Pre-Recorded Video

Repurpose existing video assets, or if a presenter can't join live, pre-record their portion and blend it with the live presenters.

Mobile Devices

Go live from a iPhone, iPad, Android phone or tablet.

*Coming 2018

Video Encoders

Broadcast from events or video studios using industry-standard video encoders.
