

Overview

At Intrado, we understand that education, training and certification play a vital role in the success of your programs. With our new certification tool, we make it easy for companies to **incorporate testing, scoring, and validation functionality** within our platform. Whether you're deploying a single standalone webcast or a 365 day-a-year virtual environment, we give you the tools you need to **maximize user interaction, track and measure results and provide actionable feedback**.

With access to your own personalized reporting dashboard you can monitor and track the effectiveness of your programs in real time. See who scored the highest grade, attended the most sessions, earned the most badges - **all of the elements needed to become compliant**.

With an unsurpassed interactive experience and the capacity to reach mobile users, our software gives you the flexibility and options to **personalize your own unique certification experience**.

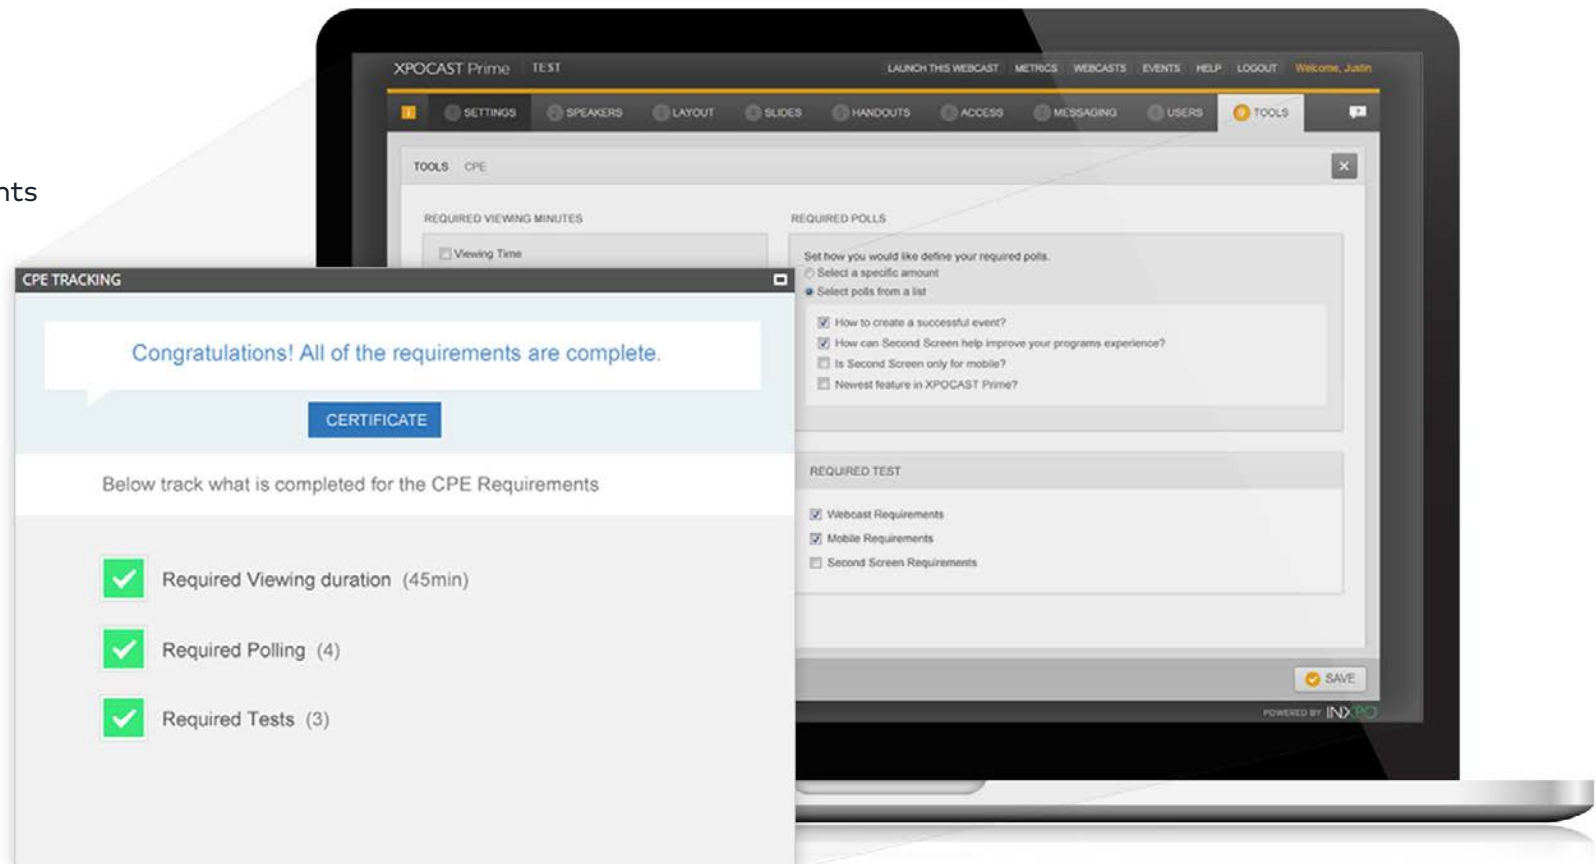

CPE Tracking for Webcasting

The CPE feature allows administrators to configure the requirements needed to earn a certificate within an individual webcast and attendees can track their progress in the new CPE panel. Additionally, event owners have the option of setting up multiple certificates for a single course. Viewers can then choose their role to receive the proper certificate.

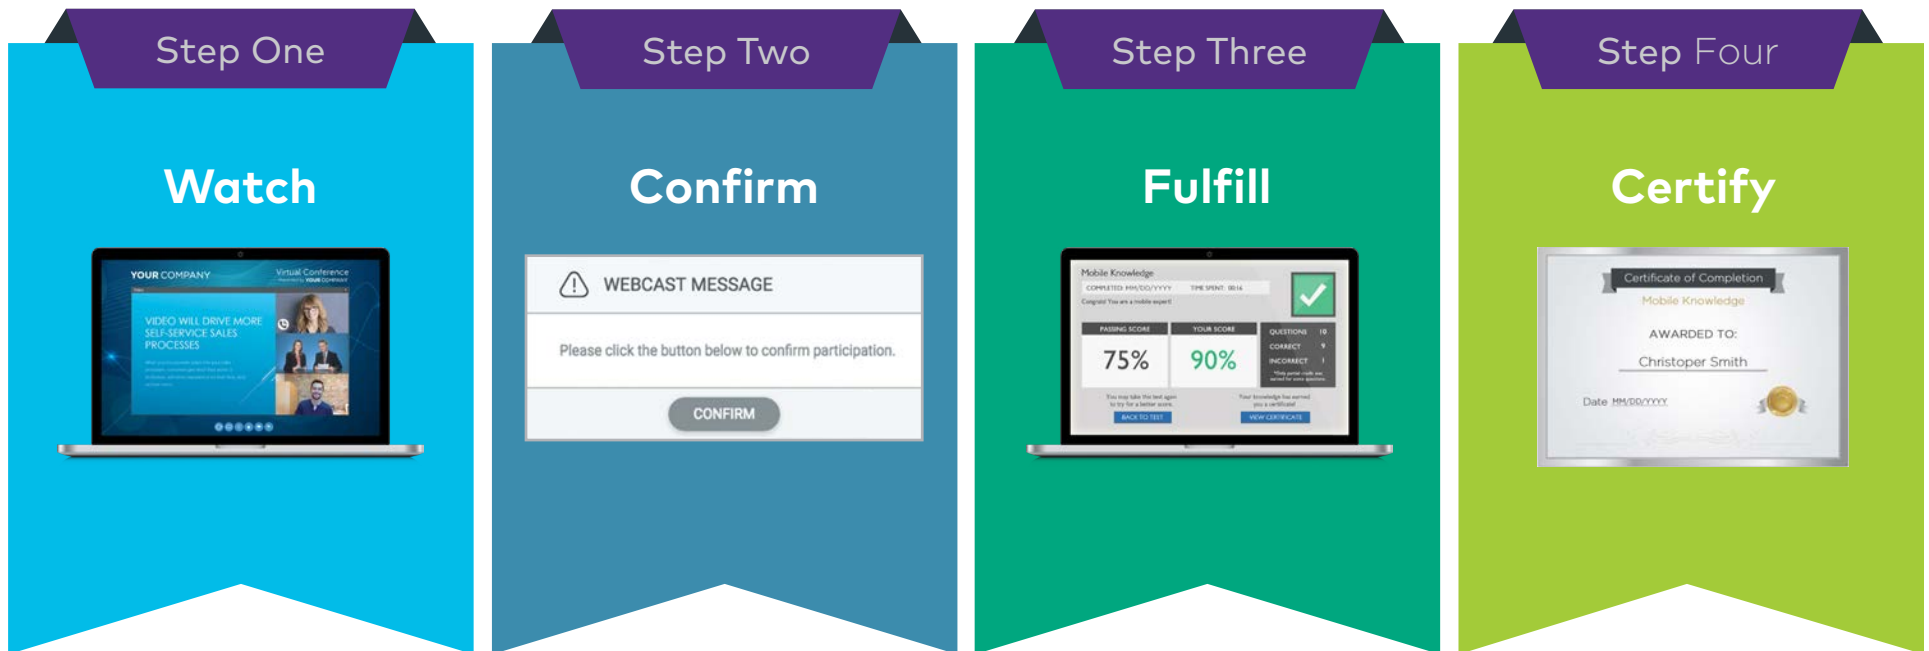

Certificate Requirement Options

- Poll Responses
- Passed Tests
- Viewing Duration
- Attendee Checkpoints

Process

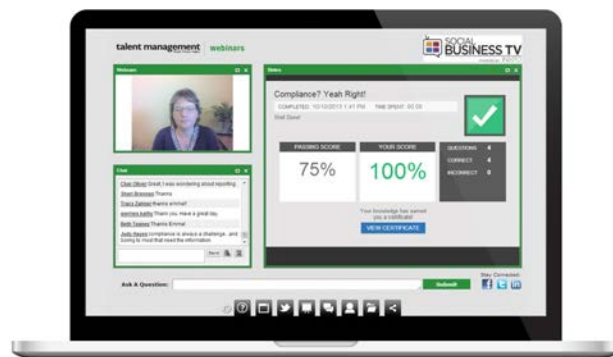

Automate the process for attendees to earn certificates with Intrado's Attendee Checkpoints. When attendees answer 75% of Attendee Checkpoints, they will be allowed to download a certificate personalized for them. This feature reduces manual efforts companies need to take to determine which attendees achieved the certification requirement.

Popular Use Cases

Implementing testing and certification into your programs couldn't be easier. Whether it's a pre-test or post-test, onboarding new employees or developing a program to grow the skills of current ones, Intrado's certification tool allows you to deploy tests within any one of our Webcasting, Virtual Event, Social Business TV, and Communities environments.

Our customers have found success using Intrado's NEW certification feature for many different applications including:

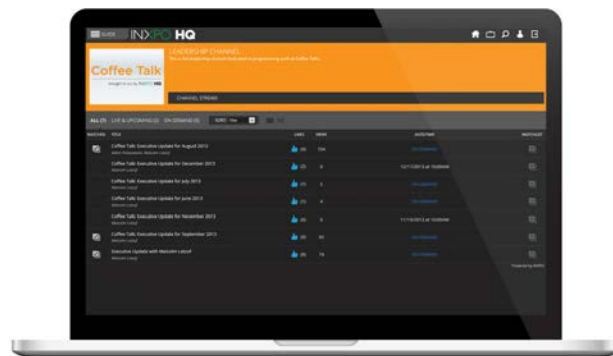

New Employee Onboarding

Skills & Career Development

Product Training

Internal Communication

Talent Recruitment

Continuing Education & Compliance
