QoE Dashboard

Overview

Built within the Intrado Studio Producer Tool, the **QoE (Quality of Experience) Dashboard** provides real-time tracking of individual attendee and speaker connections to better diagnose any technical issues within the presentation. These insights will help organizers quickly adjust content delivery to give the audience the best viewing experience and avoid any further issues.

Key Features

- Attendee video and audio bitrate monitoring

- Connection statistics available for all sources (webcams, encoders, VCUs, etc.)

- Color-coded connections for quick analysis of problem areas

- CDN overview gives insight into stream traffic patterns for internal and external audiences
